MORE WAISTS

Call it waists, call it rises. When the least & last brands still struggle to adopt high waists / rises, the first and leading designer brands already praise low waists / rises.

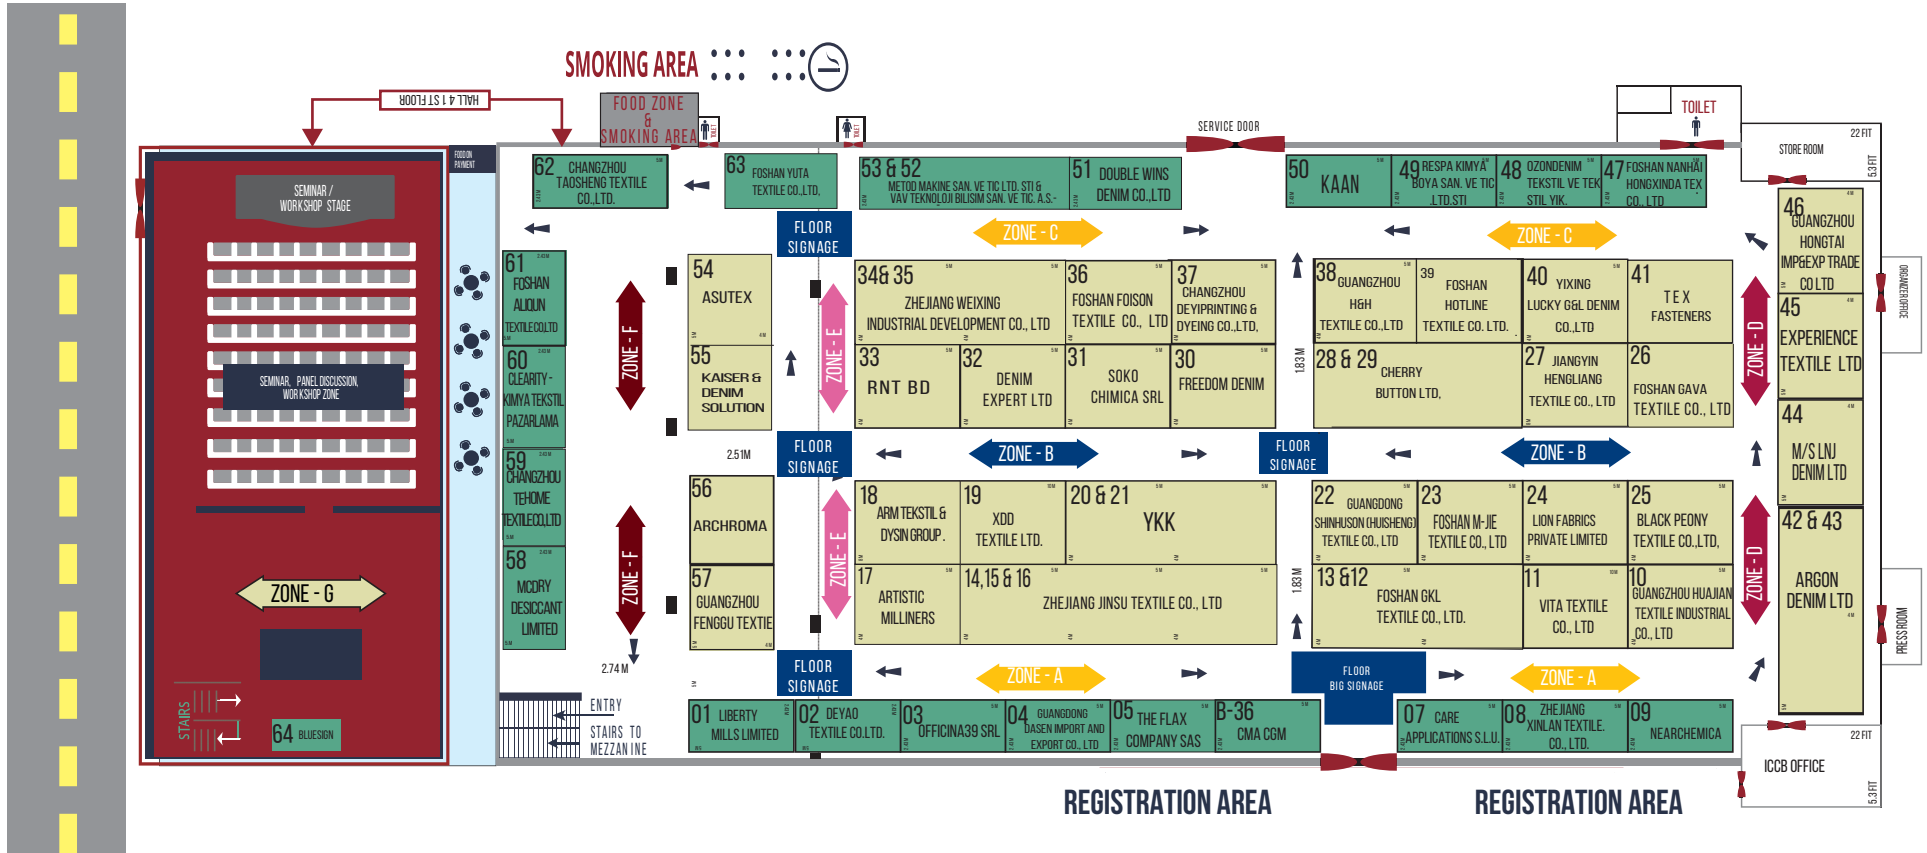

Think about a fast change in aesthetics. Think also about the fact that lower waists and rises are more comfortable to wear. Think about generation Z continuously wanting to show more skin, and other grown-ups or leaders, wanting to look like they're into low-waist / high-rise. So, let's look at more waists!

look for denim low waist / high rise to come with the help of denim washes that help denim to look like it's been worn for a long time
